granite kerbs

Pietra Granite Kerbs are hand dressed and their subtle colour and natural finish ensure that they blend well with any of the Pietra paving products.

The Pietra Granite Kerb is popular when continuing or replacing existing traditional large kerbs.

The Pietra Kerbstone size is commonly used in a driveway or domestic situation as the smaller unit size allows the easy creation of curves.

The one line dressed finish leaves a fine textured surface on the product, while the hand dressed finish leaves the kerb with a more natural rugged texture. Both finishes ensure the product retains its unique aesthetic appeal that is widely required from natural stone products.
