

tegula

Whatever design or colour you choose, the attractiveness and excellent structural performance of the Tegula range represents excellent value for money.

Laying various sized blocks as seen in the swatches is very effective and this is now made easier by the introduction of Tegula Trio, a three sized mixed bale which can be machine or hand laid.

Tegula is also available in Hydropave, our permeable paving range, which has been designed with a unique spacer that allows rain water to infiltrate through the joints and into the bedding layers. For further information on Hydropave please contact your local Paving & Walling Centre.
